

Bows for Tap Shoes

Instructions on how to sew bows on to the elastic of the Tap Shoe

1. Please do not untie bows.

2. Place the bow in the center of the elastic with the ends of the bow facing out towards the toe.

3. Sew through all layers of the ribbon. Pull the ends to make sure you got through all of the layers. This is very important because if the ribbon loosens, the dancer can trip on the ends. Sew through 6 to 7 times.

4. Cut the ends even with the top of the tap shoe so that they do not hang below the shoe.

5. After the bow is secure, burn the edges of the ribbon to prevent fraying.

6. You have successfully completed your tap bows.

Thank You,
Miss Emily
